6th Users' Conference of IT4Innovations

Thursday, 3 November 2022

<u>Users' Talks III</u> - atrium (16:30 - 17:50)

time	[id] title	presenter
16:30	[81] Moving-mesh radiation-hydrodynamic modelling of astrophysical transients: methods and first results	Dr CALDERÓN, Diego
16:50	[96] Benchmarking Barbora, Karolina and LUMI Using the k-Wave Toolbox	JAROS, Jiri
17:10	[104] Excitation of wide band gap materials from first principles: studying the role of laser polarization using real-space real-time time-dependent density functional theory	Dr DERRIEN, Thibault J.-Y.
17:30	[109] Computational advances in modelling of radiative interactions in the PALM LES model	Dr KRC, Pavel
