

# ACCESSING CLUSTER

Khyati Sethia, Petr Strakoš

# SSH access, generating key pair, etc.

## | In short:

| Generate key pair using terminal or PowerShell

| `$ ssh-keygen -f path/key_name`

| Protecting read access to private key if necessary

| `$ chmod go-r path/key_name`

| Registering public key on the cluster

| <https://extranet.it4i.cz/ssp/?action=changesshkey>

| Accessing cluster (Karolina)

| `$ ssh -i path/private_key_name user_name@karolina.it4i.cz`

|
