

Kick-off meeting of the Global Expert project

Wednesday, May 3, 2023

Workshop: Lukas Zdrzil: Fluorescent carbon nano colloids for heavy metal detection - atrium (2:00 PM - 2:20 PM)

Workshop: Miroslav Medved: Quantum mechanical insights into the optical properties of carbon dots - atrium (2:20 PM - 2:40 PM)

Workshop: Zdenek Badura: Utilization of EPR for unveiling the nature of spin systems in novel low-dimensional materials - atrium (2:40 PM - 3:00 PM)

Workshop: Martin Pykal: Initial steps of carbon dots formation by means of molecular dynamics - atrium (3:00 PM - 3:20 PM)

Workshop: David Reha: Mechanism of bottom-up synthesis of carbon dots from citric acid and ethylenediamine as precursors - atrium (3:20 PM - 3:40 PM)

Workshop: Michal Otyepka: Concluding remarks - atrium (3:40 PM - 4:00 PM)
