

# **CONNECTION TO AZURE VM**

## Login to the machine using noVNC

- 1. Connect to the internet
- 2. We will assign you a number of your instance (represented by xxx below)
- 3. Open your browser and go to

#### ostrava-novXXX.westeurope.cloudapp.azure.com/vnc

#### 4. Use password intel123

5. You should see a GNOME desktop in your browser

#### If you see this...it worked

## Hands-on Activity:

Find out what kind of machine you are running on

- 1. Log onto the VM
- 2. In the VM open a terminal
- 3. Run the following command:

#### lscpu

- How many cores do you have?
- Is hyperthreading enabled?
- What version of vectorisation is supported?

### Accessing Jupyter notebooks

- 1. Log onto the VM (See first slide)
- 2. In the VM open a terminal
- 3. Run the following command:

#### jupyter notebook

A jupyter notebook should open with the home folder in the vmmr example

#### Login to the machine using noVNC

1. Connect to the internet

- 2. We will assign you a number of your instance (represented by xxx below)
- 3. Open your browser and go to

#### ostrava-novXXX.westeurope.cloudapp.azure.com/vnc

- 4. Use password intel123
- 5. You should see a GNOME desktop in your browser

### Legal Disclaimer & Optimization Notice

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information visit <u>www.intel.com/benchmarks</u>.

#### **Optimization Notice**

Intel's compilers may or may not optimize to the same degree for non-Intel microprocessors for optimizations that are not unique to Intel microprocessors. These optimizations include SSE2, SSE3, and SSSE3 instruction sets and other optimizations. Intel does not guarantee the availability, functionality, or effectiveness of any optimization on microprocessors not manufactured by Intel. Microprocessor-dependent optimizations in this product are intended for use with Intel microprocessors. Certain optimizations not specific to Intel microarchitecture are reserved for Intel microprocessors. Please refer to the applicable product User and Reference Guides for more information regarding the specific instruction sets covered by this notice.
