allinea

High performance tools to debug, profile, and analyze your applications

Allinea Tools Workshop

Friday 6th November 2015
9:30am – 4:30pm
VŠB - Technical University Ostrava,
IT4Innovations building,
room 207

By providing integrated development tools, designed to handle the scale of today's systems and software, Allinea enables **developers**, **computational scientists** and **engineers** to meet the challenges of **developing concurrent software** head on.

This workshop will present the different Allinea tools:
- Allinea Forge, a unified environment which provides Allinea DDT, a scalable debugger, and Allinea MAP, a lightweight profiler
- Allinea Performance-Reports, to analyse the behaviour of an application run
